

How to connect using Oracle SQL Developer:

You need to use the HKUST SSL VPN to connect, even if you are at the school.

(If you haven't used the VPN yet, follow the tutorial here:

<https://itsc.hkust.edu.hk/services/cyber-security/vpn>)

Click the green + sign on the upper left, then select new database connection.

Then:

New / Select Database Connection

Connection ... Connection ...
comp3311 t... comp3311t...

Name: comp3311 ta1 Name you like

Database Type: Oracle

User Info Proxy User

Authentication Type: Default Your account and password

Username: comp3311ta1 Role: default

Password: ☒ Save Password

Connection Type: Basic

Details Advanced Fill in as is

Hostname: dbsvr1.cse.ust.hk

Port: 1521

☐ SID

☒ Service name: comp3311.cse.ust.hk

Status :

Help Save Clear Test Connect Cancel

What if the SQL Developer hangs whenever it starts up:

Usually occur for mac users. Before it hangs, click 'Window' -> 'Close Welcome Page' then you are good to go.

How to change the password:

After you successfully connect to the database, right-click on it, you can see the reset password selection.
